Supplemental Cash Flow Information (Note 12)

The accompanying notes are an integral part of these financial statements

Valterra Resource Corporation
(An Exploration Stage Company)
Notes to Financial Statements
For The Six Months Ended June 30, 2010 and 2009

1. Nature of Operations and Going Concern

Valterra Resource Corporation (the "Company") is an exploration stage company. The Company was incorporated in Alberta, continued to the Yukon on May 8, 1997 and subsequently continued to British Columbia on February 22, 2008.

The Company's principal business activities include the acquisition, exploration, and development of mineral natural resource properties. The Company is in the exploration stage and has not yet determined whether any of its mineral properties contains ore reserves.

The Company is engaged in the exploration of mineral properties. The business of exploring for minerals involves a high degree of risk and there can be no assurance that any of the Company's current or future exploration programs will result in profitable mining operations. The Company has no source of revenue, and has significant cash requirements to meet its administrative overhead and maintain its mineral interests. The recoverability of amounts shown for mineral properties is dependent upon the discovery of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete their exploration and development, and establish future profitable operations, or realize proceeds from the sale of the mineral properties. The outcome of these matters cannot be predicted at this time.

These financial statements were prepared on a "going concern" basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. Currently the Company is unable to self-finance operations, has limited resources, no source of operating cash flow and no assurances that sufficient funding will be available to conduct further exploration and development of its mineral property projects.

The Company had a net working capital deficiency of \$692,056 (current assets of \$415,157 minus current liabilities of \$1,107,213) as at June 30, 2010 compared to a net working capital deficiency of \$207,935 as at December 31, 2009 (current assets of \$601,108 minus current liabilities \$809,043). Excluding cash reserved for Canadian exploration expenditures of \$390,522, net working capital deficiency as at June 30, 2010 was \$1,082,578 (December 31, 2009: \$708,763).

The Company does not hold any revenue generating properties and thereby continues to incur losses. As at June 30, 2010, the Company has an accumulated deficit of \$6,844,885 (December 31, 2009: \$6,784,946).

The Company has relied mainly upon the issuance of share capital to finance its activities. Future capital requirements will depend on many factors including the Company's ability to execute its business plan. The Company intends to continue relying upon the issuance of share capital to finance its future activities but there can be no assurance that such financing will be available on a timely basis under terms acceptable to the Company. Inability to secure future financing would have a material adverse effect on the Company's business, results of operations and financial condition.

Failure to continue as a going concern may require restatement of assets and liabilities on a liquidation basis, which could differ materially from the going concern basis. These financial statements do not include the adjustments that would be necessary should the Company be unable to continue as a going concern.

Valterra Resource Corporation
(An Exploration Stage Company)
Notes to Financial Statements
For The Six Months Ended June 30, 2010 and 2009

2. Basis of presentation

These financial statements are prepared in accordance with Canadian Generally Accepted Accounting Principles ("GAAP").

These unaudited interim financial statements do not contain all of the information required for annual financial statements and they should be read in conjunction with the Company's annual audited financial statements for the fiscal year ended December 31, 2009 ("AFS"). The results for the six months ended June 30, 2010 are stated utilizing the same accounting policies and methods of application as the most recent audited annual consolidated financial statements, but are not necessarily indicative of the results to be expected for the full year. All material adjustments, which, in the opinion of management, are necessary for a fair presentation of the results of the interim periods, have been reflected.

The Company's reporting currency is the Canadian dollar and all dollar amounts are in Canadian dollars, unless otherwise indicated.

3. Summary of Significant Accounting Policies and Accounting Changes

(a) Future Accounting Changes

(i) Business Combinations

In January 2009, the CICA issued CICA Handbook Section 1582, Business Combinations, Section 1601, Consolidations, and Section 1602, Non-controlling Interests. These sections replace the former CICA Handbook Section 1581, Business Combinations and Section 1600, Consolidated Financial Statements and establish a new section for accounting for a non-controlling interest in a subsidiary.

Section 1582 and 1602 will require net assets, non-controlling interests and goodwill acquired in a business combination to be recorded at fair value and non-controlling interests will be reported as a component of equity. In addition, the definition of a business is expanded and is described as an integrated set of activities and assets that are capable of being managed to provide a return to investors or economic benefits to owners. Acquisition costs are not part of the consideration and are to be expensed when incurred. Section 1601 establishes standards for the preparation of consolidated financial statements.

These new sections apply to interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011. Earlier adoption of these sections is permitted as of the beginning of a fiscal year. All three sections must be adopted concurrently. The Company will evaluate the impact of these new sections on its financial statements when applicable.

Valterra Resource Corporation
(An Exploration Stage Company)
Notes to Financial Statements
For The Six Months Ended June 30, 2010 and 2009

3. Summary of Significant Accounting Policies and Accounting Changes, continued

(a) Future Accounting Changes, continued

(ii) International Financial Reporting Standards (“IFRS”)

In February 2008, the Canadian Accounting Standards Board confirmed that publicly accountable enterprises will be required to adopt IFRS for fiscal years beginning on or after January 1, 2011, with early adoption permitted. Accordingly, the conversion to IFRS will be applicable to the Company’s interim and annual financial statements relating to reporting periods beginning on or after January 1, 2011 with restatement of comparative information presented.

The conversion to IFRS will impact the Company’s accounting policies, information technology and data system, internal control over financial reporting, and disclosure controls and procedures. The Company has established an implementation team and developed a plan to implement the changeover to IFRS on a timely basis.

4. Capital Management

The capital of the Company consists of components of shareholders’ equity. Capital requirements are driven by the Company’s exploration activities on its mineral property interests. The Company’s primary process for managing capital consists of the ongoing assessment of current capital resources against budgeted exploration and administrative expenditures. In order to maintain or adjust the capital structure, the Company may issue new shares. There can be no assurance that the Company will be able to obtain equity capital in the case of operating cash deficits.

As the Company is in the exploration stage, its operations have been funded by the issuance of common shares. The Company will continue to rely on share issuances for future funding depending upon market and economic conditions at the time.

The Company’s objectives of capital management are to safeguard the entity’s ability to support the Company’s normal operating requirements on an ongoing basis, continue the exploration of its mineral properties and support any expansionary plans. The Company has funded these requirements primarily through issuance of share capital.

The Company is not subject to externally imposed capital requirements other than those related to its credit facility disclosed in Note 9. The Company is in compliance with the externally imposed capital requirements disclosed in Note 9.

Valterra Resource Corporation
(An Exploration Stage Company)
Notes to Financial Statements
For The Six Months Ended June 30, 2010 and 2009

5. Financial Instruments

The Company's financial instruments comprise cash, reclamation bonds, investments, bank indebtedness, accounts payable and accrued liabilities, and amounts due to related parties. The Company has classified its financial instruments into the following categories:

Financial Assets	June 30, 2010			December 31, 2009		
	Held-for-trading	Available-for-sale	Loans and Receivables	Held-for-trading	Available-for-sale	Loans and Receivables
Cash	\$ 394,945	\$ -	\$ -	\$ 587,199	\$ -	\$ -
Investments	-	12,500	-	-	20,000	-
Reclamation bonds	-	-	45,000	-	-	45,000
	\$ 394,945	\$ 12,500	\$ 45,000	\$ 587,199	\$ 20,000	\$ 45,000

Financial Liabilities	June 30, 2010		December 31, 2009	
	Other Financial Liabilities		Other Financial Liabilities	
Bank indebtedness	\$	198,337	\$	197,808
Accounts payable and accrued liabilities	\$	200,182	\$	147,498
Due to related parties	\$	708,694	\$	463,737
	\$	1,107,213	\$	809,043

Fair Value

The carrying values of cash, reclamation bonds, accounts receivable, bank indebtedness, accounts payable and accrued liabilities and due to related parties are a reasonable estimate of their fair values due to the relatively short time period to maturity. The fair value of investments is based on their quoted market price in an active market for these investments.

The Company classifies its financial instruments measured at fair value at one of three levels according to the relative reliability of the inputs used to estimate the fair value:

Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and

Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Valterra Resource Corporation
(An Exploration Stage Company)
Notes to Financial Statements
For The Six Months Ended June 30, 2010 and 2009

5. Financial Instruments, continued

The following table sets forth the Company's financial assets measured at fair value by level within the fair value hierarchy:

	Level 1	Level 2	Level 3	Total
Investment	\$ 12,500	\$ -	\$ -	\$ 12,500

The Company is exposed to the following risks arising from its financial instruments:

(a) Interest Rate Risk

The Company is exposed to interest rate risk on its bank indebtedness, as the payments fluctuate with changes in interest rates.

Based on the current balance of the bank indebtedness, an assumed 0.5 percent increase or decrease in interest rates would not have a material effect on the Company's results of operations.

(b) Credit Risk

The Company is exposed to credit risk mainly in respect to managing its cash position. The Company mitigates credit risk by risk management policies, that require cash deposits or short-term investments be invested with Canadian chartered banks rated BBB or better, or commercial paper issuers R1/A2/P2 or higher. All investments must be less than one year in duration.

(c) Currency Risk

The Company is exposed to currency risk to the extent expenditures incurred or funds received and balances maintained by the Company are denominated in currencies other than the Canadian dollar. The Company does not use any hedges or other derivatives to mitigate the risk against foreign exchange fluctuations.

In May 2008, the Company entered into an option agreement to acquire 100% undivided interest in Star claims group (see Note 8 of AFS), whereby the Company is required to make payments totaling US \$280,000 with the next payment of US \$25,000 due May 13, 2011. An appreciation or depreciation of the US dollar by 10% can affect the Company's cash flow by \$30,000 over the term of the agreement.

As at June 30, 2010 the Company had no amounts receivable or amounts payable in any other currencies than the Canadian dollar.

Valterra Resource Corporation
(An Exploration Stage Company)
Notes to Financial Statements
For The Six Months Ended June 30, 2010 and 2009

5. Financial Instruments, continued

(d) Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in obtaining funds to meet commitments. The Company's approach to managing liquidity risk is to provide reasonable assurance that it will have sufficient funds to meet liabilities when due by forecasting cash flows for operations and anticipated investing and financing activities. The Company normally maintains sufficient cash and cash equivalents to meet the Company's business requirements.

As at June 30, 2010 the cash balance of \$394,945 would be insufficient to meet the cash requirements for the Company's administrative overhead, maintaining its mineral interests, and continuing with its exploration program in the following few months. However, the Company will be required to raise additional capital in order to fund its operations.

6. Reclamation Bonds

The Company has posted bonds against any potential land restoration costs that may be incurred in the future on certain properties. The monies are held in trust, earning nominal interest and may be released after required reclamation is satisfactorily completed.

As at June 30, 2010 the amount on deposit was \$45,000 (December 31, 2009: \$45,000), of which \$35,000 is for the Swift Katie Property, and \$10,000 is for the Star Property.

The Company has accrued interest of \$402 on the reclamation bond of \$30,000 for Swift Katie Property.

7. Investments

The Company acquired 100,000 common shares in Tosca Mining Corporation ("Tosca"), which are classified as available-for-sale. The closing price for Tosca shares as at June 30, 2010 was \$0.125 per share. The Tosca shares were obtained in consideration for payments required pursuant to a property option agreement on the Swift Katie property, located in the Nelson Mining Division, British Columbia, Canada.

8. Mineral Properties

The Company has interests in four mineral properties, located in British Columbia, Canada. These are Star, Swift Katie, Toughnut, and Rozan. Details of option agreements in respect of Star, Swift Katie, and Toughnut are disclosed in the notes to the AFS.

Valterra Resource Corporation
(An Exploration Stage Company)
Notes to Financial Statements
For The Six Months Ended June 30, 2010 and 2009

8. Mineral Properties, continued

(a) Rozan Property

On January 13, 2010, the Company entered into an option agreement to acquire a 100% undivided interest in the Rozan property, comprising thirty-two mineral claims located near Nelson, BC (the "Rozan Property").

To acquire a 100% interest in the Rozan Property, the Company is required to make staged payments totaling \$200,000, incur total exploration expenditures of \$1,000,000, and issue 350,000 units (each unit consisting of one common share and one warrant, each warrant exercisable at \$0.06 for a period of five years) to the Optionors over the next five years as follows:

- (i) Issue 50,000 units on the signing of the agreement (issued).
- (ii) Pay \$30,000, issue 50,000 units, and incur not less than an aggregate \$50,000 of exploration expenditures on or before January 13, 2011;
- (iii) Pay \$30,000, issue 50,000 units, and incur not less than an aggregate \$250,000 of exploration expenditures on or before January 13, 2012;
- (iv) Pay \$40,000, issue 50,000 units, and incur not less than an aggregate \$500,000 of exploration expenditures on or before January 13, 2013;
- (v) Pay \$40,000, issue 50,000 units, and incur not less than an aggregate \$750,000 of exploration expenditures on or before January 13, 2014;
- (vi) Pay \$60,000, issue 100,000 units, and incur not less than an aggregate \$1,000,000 of exploration expenditures on or before January 13, 2015.

The Company issued 50,000 shares at a fair value of \$0.06 per share and issued 50,000 warrants at a fair value of \$0.057 to the Optionors on signing of the option agreement.

The Optionors of the Rozan Property retain a net smelter return ("NSR") royalty of 2% on the mineral claims of the property. The Company has the option to purchase one-half of the Optionors' NSR royalty by payment of the sum of \$500,000.

(b) Star Property

In order to facilitate the Star option payment on May 13, 2010 as per the option agreement, the Company received advances from two directors and officers and two employees of the Company for \$25,494.

(c) Toughnut Property

On March 4, 2010 the parties to the Toughnut option agreement amended the option payment and exploration commitment due on March 10, 2010 as follows:

- Issue 100,000 common share on or before March 10, 2010 (Issued)
- Incur \$300,000 in exploration expenditures on or before September 30, 2010 and
- Pay \$30,000 on or before August 1, 2010 (\$6,000 paid, negotiations are underway to modify the option agreement)

Valterra Resource Corporation

Notes to Financial Statements
For The Six Months Ended June 30, 2010 and 2009

8. Mineral Properties, continued

(d) Mineral Properties Expenditures

All costs related to the acquisition, exploration and development of mineral properties are capitalized until such time these mineral properties are placed into commercial production, sold or abandoned.

A summary of capitalized acquisition and exploration expenditures on the Company's properties as at June 30, 2010 is as follows:

Mineral Properties	Toughnut \$	Star \$	Swift Katie \$	Rozan \$	Total \$
Acquisition costs					
Balance as at December 31, 2009	19,453	33,484	133,889	-	186,826
Additions during the period	3,079	26,322	-	7,845	37,246

Valterra Resource Corporation
(An Exploration Stage Company)
Notes to Financial Statements
For The Six Months Ended June 30, 2010 and 2009

8. Mineral Properties, continued

(e) Shares Issued for Mineral Property

The Company issued 50,000 shares at a fair value of \$0.06 per share to the Optionors on signing of the option agreement for Rozan property and issued 50,000 warrants at a fair value of \$0.057 as per the agreement.

The Company issued 100,000 shares at a fair value of \$0.03 per share to the Optionors as per the option agreement for the Toughnut property.

9. Bank Indebtedness

Bank indebtedness is due on demand, bears interest at prime plus 1% per annum, and is secured by a letter of credit from Schrodgers (C.I.) supported by a guarantee by a company owned by a shareholder of the Company. During 2006, the Company issued 200,000 shares at an agreed price of \$0.20 per share, as consideration for the guarantee.

Under the credit facility letter the Company is required to obtain written consent from the bank prior to paying or declaring any dividends, reducing its share capital, reorganizing or changing of control.

Balance as at June 30, 2010 was \$198,337 (December 31, 2009: \$197,808).

10. Related Party Balances and Transactions

Following are the related party transactions that the Company entered into during the six months ended June 30, 2010 and the outstanding balances as at June 30, 2010:

(a) Under the service agreement, as amended, between the Company and a company privately held by a director and officer of the Company, the Company was charged as follows:

- \$51,504 (June 30, 2009: \$53,700) for office space and general administration services;
- \$26,764 (June 30, 2009: \$35,075) for professional services;
- \$18,495 (June 30, 2009: \$22,845) for consulting services;
- \$14,801 (June 30, 2009: \$19,344) for investor relations services;
- \$85,098 (June 30, 2009: \$111,210) for geological consulting services in relation to mineral properties
- \$1,988 (June 30, 2009: \$2,172) in respect of the mark-up on out-of-pocket expenses, which were included in office and general expenses.

Amounts payable under the agreement at June 30, 2010 were \$512,728 (December 31, 2009: \$369,887).

Valterra Resource Corporation
(An Exploration Stage Company)
Notes to Financial Statements
For The Six Months Ended June 30, 2010 and 2009

10. Related Party Balances and Transactions, continued

- (b) Fees in the amount of \$13,035 (June 30, 2009: \$39,183) were charged by a law firm controlled by a company privately held by a director and officer of the Company and included in investor relations, professional fees, share issue costs and mineral property expenditures. Amounts payable as at June 30, 2010 were \$72,319 (December 31, 2009: \$58,675).
- (c) Consulting fees relating to office administration of \$12,000 (June 30, 2009: \$12,000) were charged by a private company controlled by an officer (resigned as an officer effective July 2010) of the Company. Amounts payable as at June 30 2010 were \$23,100 (December 31, 2009: \$10,500).
- (d) Independent director's fees of \$23,250 (June 30, 2009: \$22,125) were charged. Amounts payable as at June 30, 2010 were \$50,378 (December 31, 2009: \$27,493)
- (e) In order to facilitate the Star option payment on May 13, 2010 as per the option agreement, the Company received advances from two directors and officers and two employees of the Company for \$25,494.
- (f) Consulting fees relating to corporate development and financing activities was charged by a private company controlled by a former director of the Company in the previous fiscal year and were included in consulting fees and share issue costs in 2009. Amounts payable as at June 30, 2010 were \$24,675 (December 31, 2009: \$24,675).

The total amount due to related parties as at June 30, 2010 was \$708,694 (December 31, 2009: \$463,737). Amounts due to related parties are unsecured, non-interest bearing, and have no formal terms of repayment.

These transactions are in the normal course of operations and are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

11. Share Capital and Contributed Surplus

(a) Authorized

- (i) Unlimited common shares without par value; and
- (ii) Unlimited preference shares without par value.

Tax benefits renounced to flow-through share subscribers	-	(250,000)	-
Balance as at December 31, 2009	37,682,543	\$ 8,458,736	\$ 532,590
Shares for mineral property payment	150,000	6,000	-
Value assigned warrants for mineral property payment	-	-	2,841
Tax benefits renounced to flow-through share subscribers	-	(190,239)	-
Balance as at June 30, 2010	37,832,543	\$ 8,274,497	\$ 535,431

(c) Equity Financings

Six Months Ended June 30, 2010

The Company did not announce or participate in any equity financings or private placements during the six months ended June 30, 2010.

Valterra Resource Corporation
(An Exploration Stage Company)
Notes to Financial Statements
For The Six Months Ended June 30, 2010 and 2009

11. Share Capital and Contributed Surplus, continued

(d) Shares Issued for Mineral Property

Six Months Ended June 30, 2010

The Company issued 50,000 shares at a fair value of \$0.06 per share to the Optionors on signing of the option agreement for Rozan property (see Note 8 (a)) and issued 50,000 warrants at a fair value of \$0.057 as per the agreement.

The Company issued 100,000 shares at a fair value of \$0.03 per share to the Optionors as per the option agreement for the Toughnut property.

(e) Renunciation of Flow-Through Shares

The Company recorded a future income tax recovery of \$190,239 and recognized a charge against share capital in the same amount, in connection with the renunciation of flow-through expenditures of \$760,957 in February 2010.

(f) Stock Options

As at June 30, 2010, the Company had a stock option plan (the "Plan") allowing for the reservation of common shares issuable under the Plan to a maximum 10% of the number of issued and outstanding common shares of the Company at any given time. The terms of any stock option granted under the Plan may not exceed five years and the exercise price may not be less than the closing price of the Company's shares on the last business day immediately preceding the date of grant, less any permitted discount. On an annual basis, the Plan requires approval by the Company's shareholders and submission for regulatory review and acceptance.

The Company's stock options transactions and outstanding balances for the six months ended June 30, 2010 are summarized as follows:

Valterra Resource Corporation
(An Exploration Stage Company)
Notes to Financial Statements
For The Six Months Ended June 30, 2010 and 2009

11. Share Capital and Contributed Surplus, continued

(f) Stock Options, continued

Exercise Price	Expiry Date	Balance December 31, 2009	Cancelled or Expired	Balance June 30, 2010

\$0.15	December 23, 2011	169,125	-	169,125
\$0.10	December 23, 2011	312,500	-	312,500
\$0.10	December 23, 2011	7,500	-	7,500
\$0.06	January 14, 2015	-	50,000	50,000
		10,202,388	50,000	10,252,388
Weighted average exercise price		\$0.16	\$0.06	\$0.16
Weighted average contractual life in years		1.63		1.15

During the six months ended June 30, 2010, the Company granted 50,000 warrants in respect to the property option agreement for the Rozan Property (Note 8 (a)). The Company recognized non-cash cost of \$2,841 in respect to the warrants, being the fair value of the warrants calculated using the Black-Scholes option-pricing model.

Valterra Resource Corporation
(An Exploration Stage Company)
Notes to Financial Statements
For The Six Months Ended June 30, 2010 and 2009

11. Share Capital and Contributed Surplus, continued

(h) Fair Value Determination

The Company applies the fair value method of accounting for stock-based awards and, accordingly, the fair value of stock-based awards is expensed in the statements of operations and deficit or capitalized to mineral properties as appropriate.

The fair value of stock options and share purchase warrants granted during the six months ended June 30, 2010 was estimated at the date of grant using the Black-Scholes option-pricing model with the following assumptions:

	June 30,2010		June 30, 2009	
	Options	Warrants	Options	Warrants
Risk-free interest rate	n/a	2.56%	2.11%	1.41%
Expected share price volatility	n/a	170.60%	117.44%	131.33%
Expected option/warrant life in years	n/a	5.0	5.0	2.0
Expected dividend yield	n/a	0%	0%	0%

(i) Stock Based Compensation

	June 30, 2010		June 30, 2009	
Consultants	\$	-	\$	-
Directors and officers		-		2,751
Employees		-		-
Total	\$	-	\$	2,751

Option pricing models require the input of highly subjective assumptions. Changes in the subjective input assumptions can materially affect the fair value estimate, and therefore the existing models may not necessarily provide a single reliable measure of the fair value of the Company's stock options and brokers warrants.

Valterra Resource Corporation
(An Exploration Stage Company)
Notes to Financial Statements
For The Six Months Ended June 30, 2010 and 2009

13. Commitments

(a) Service Agreement

Under a service agreement, as amended, between the Company and a company privately held by a director and officer of the Company, the Company is charged \$8,000 monthly for office accommodation and office management services. The agreement expires on June 30, 2012. The Company may terminate the agreement at any time by paying the remaining monthly fees for a year from the date of the written notice of the termination.

Valterra Resource Corporation
(An Exploration Stage Company)
Notes to Financial Statements
For The Six Months Ended June 30, 2010 and 2009

13. Commitments, continued

(a) Service Agreement, continued

The fee commitment for the next three years is as follows:

Six months ending June 30,	Commitment \$
2010	48,000
2011	96,000
2012	48,000

(b) Flow-Through Expenditures

Funds raised through the issuance of flow-through shares are required to be expended on qualifying Canadian mineral exploration expenditures, as defined pursuant to Canadian income tax legislation. The flow-through gross proceeds less the qualified expenditures made to date represent the funds received from flow-through share issuances that have not been spent and are held by the Company for such expenditures.

The Company is committed to incur qualifying Canadian exploration expenditures of \$551,025 by December 31, 2010 relating to the private placements of flow-through shares completed in December 2009.

As at June 30, 2010, the Company has incurred qualifying expenditures of approximately \$207,100 with respect to exploration activities at its mineral properties, with a remaining commitment of \$343,925 to be incurred by December 31, 2010.

14. Subsequent Events

The Company has no material subsequent events to report.

Management's Discussion and Analysis

In respect of the six months ended June 30, 2010

A. Introduction

This Management's Discussion and Analysis ("MD&A") of the operating results and financial condition of Valterra Resource Corporation (the "Company") is dated August 18, 2010 and relates to the six months ended June 30, 2010. This MD&A was prepared to conform to National Instrument 52-101F1 and was approved by the Board of Directors prior to its release. This analysis must be read in conjunction with the Company's interim financial statements for the six months ended June 30, 2010 and its audited financial statements for the year ended December 31, 2009 and the accompanying notes. All notes referenced herein may be found in the interim financial statements.

The Company's financial statements were prepared in accordance with Canadian Generally Accepted Accounting Principles ("GAAP").

The Company's shares trade on the Canadian National Stock Exchange ("CNSX") under the symbol "VTA" and on the Frankfurt Stock Exchange, open market (Freiverkehr) under the trading symbol "3VA.F". Effective September 19, 2008 CNSX has assigned a new trading symbol from the previous symbol "VALT."

The Company's reporting currency is the Canadian dollar and all dollar amounts are in Canadian dollars, unless otherwise indicated.

Certain forward-looking statements are discussed in the MD&A with respect to the Company's activities and future financial results. These are subject to significant risks and uncertainties that may cause actual results or events to differ materially from projected results or events.

Additional information relating to the Company, including detailed drill results previously disclosed in news releases, is available on the company's website at www.valterraresource.com and on SEDAR at www.sedar.com

B. Qualified Persons

Brian T. McGrath, B.Sc., P.Geo., is the qualified person under National Instrument 43-101 responsible for the technical information included in this MD&A and the supervision of work done in association with the exploration and development programs for the Company's properties. Mr. McGrath attained his Bachelors degree in Earth Sciences from Memorial University of Newfoundland in 1992. His work has focused on gold and base metal targets associated with banded iron formations (BIF), volcanogenic-hosted massive sulphide (VHMS) deposits, porphyry deposits, and lode gold systems.

Valterra Resource Corporation (An Exploration Stage Company)

Management's Discussion and Analysis

In respect of the six months ended June 30, 2010

D. Description of Business

The Company acquires and explores mineral properties in Canada. It is currently exploring for precious and base metals in the Province of British Columbia, Canada.

E. Description of Mineral Properties

As at June 30, 2010, the Company had interests in four mineral properties: the Star Property, the Swift Katie Property, the Toughnut Property, and the Rozan Property, all located near the towns of Nelson and Salmo in the Nelson Mining Division of south-eastern British Columbia.

The properties occur within a highly metallogenic area of the province that historically has hosted several important mining districts. The properties are underlain by rocks considered very favourable for the discovery of polymetallic mineralization.

i) Star Mineral Property

Pursuant to an agreement dated May 13, 2008, the Company entered into an option to acquire a 100% undivided interest in the Star claims group ("Star Property") subject to a Net Smelter Return Royalty of 3%. The Company has the option to purchase one percent of the royalty, thus reducing it to 2%, at any time prior to the commencement of commercial production by paying \$1,500,000 to the Optionors.

To acquire a 100% interest in the Star Property, the Company is required to make staged payments totalling US \$300,000 to May 13, 2017 and incur total exploration expenditures of \$400,000 to May 13, 2012. As at June 30, 2010, the Company had paid US \$45,000 and had incurred \$764,434 in exploration expenditures.

In order to facilitate the Star option payment on May 13, 2010 as per the option agreement, the Company received advances from two directors and officers and two employees of the Company for \$25,494.

The Star property is located in south-eastern British Columbia, approximately seven kilometres due southwest of the City of Nelson. The property consists of three recently staked MTO mineral claims and a group of 25 Crown-granted claims covering an area of approximately 1,037 hectares. The claims contain three historic mines that produced small amounts of Au-Ag-Cu ore from mineralized fault zones.

On June 22nd 2010, the Company mobilized a field crew to our base of operations in Salmo BC, and the Phase I drill program on the Au-Ag-Cu porphyry/shear-hosted Star property commenced June 27th. The drill proposal calls for two NQ2-sized diamond drill holes targeting the Star and Eureka mineral zones. The core logging, sampling, and shipping to Acme Labs is ongoing; the analytical results are pending.

Prior to the drilling, the Company retained Aeroquest Limited in May 2010 to conduct a helicopter-borne AeroTEM III EM-MAG geophysical survey. An area of approximately 30 square kilometres was surveyed of which a major portion of the Star tenure area was targeted (see NR-03-10). The preliminary data from the survey was very encouraging with several anomalies identified and worthy of follow up in future exploration phases. The final data and reporting from the contractor is expected in August.

Valterra Resource Corporation (An Exploration Stage Company)

Management's Discussion and Analysis

In respect of the six months ended June 30, 2010

E. Description of Mineral Properties, continued

i) Star Mineral Property, continued

In mid July 2009, the Company completed a diamond drill program on the Star Project focusing primarily on the Alma N zone. A total of 478 metres of NQ2-sized core was drilled in three centrally located holes resulting in the collection of 276 samples for Au-ICP analyses; the initial results of which were disclosed publicly on September 10, 2009 (see NR-13-09). Subsequently, assay certificates issued to the company relative to certified metallic fire assays from the 2009 Alma N zone drill program, reported in September, were inconsistent due to a laboratory error. The Company restated the drill assay composites on February 17, 2010 (see NR-02-10).

Drilling highlights included: hole VST09-007 (Alma N zone) 2.12 g/t Au and 1.63 g/t Ag over 44.50 metres, which included a higher grade intercept of 11.29 g/t Au and 5.60 g/t Ag over 2.0 metres.

During August and September 2008, the company completed its inaugural exploration program on the property by conducting surface prospecting/sampling and diamond drilling. Drilling totalled 1,672 metres in six holes and included the collection of more than 800 core samples for analyses. All assay results from this work, centered on the Alma N and Star zones, were publicly disclosed on January 22, 2009 (see NR-01-09).

Drilling highlights include: hole VST08-006 (Alma N zone) 5.94 g/t Au and 3.78 g/t Ag over 12.97 metres, which includes a higher grade intercept of 18.77 g/t Au and 11.55 g/t Ag over 4.0 metres; and drill hole VST08-004 (Star zone) 6.28 g/t Au and 7.20 g/t Ag over 2.0 metres.

The results of the programs discussed briefly above were very encouraging with all holes intersecting anomalous Au, Ag and Cu mineralization. These programs targeted a series of porphyry-type Au-copper ("Cu")-Ag mineralized areas associated with the north to north-west trending Silver King Shear Zone. Favourable zones have been delineated over an area measuring approximately two kilometres long by one kilometre wide as defined by prior drilling, geophysical surveys, and geochemistry.

ii) Swift Katie Mineral Property

Pursuant to the amended option agreement dated December 18, 2008, to earn 60% interest in the Swift Katie property the Company is required to make cash payments totaling \$85,000 (renegotiated from \$120,000), incur aggregate exploration expenditures of \$600,000 and issue 640,000 common shares (renegotiated from 440,000 common shares). As at December 31, 2009, the Company earned 60% in the property by satisfying all the requirements described above.

To earn the remaining 40% interest in the Swift Katie property, the Company must make additional cash payments of \$120,000, incur additional exploration expenditures of \$700,000 and issue 450,000 of its common shares to the Optionors by December 31, 2011.

Valterra Resource Corporation (An Exploration Stage Company)

Management's Discussion and Analysis

In respect of the six months ended June 30, 2010

E. Description of Mineral Properties, continued

ii) Swift Katie Mineral Property, continued

The Optionors of the property retain a 2% NSR on the property if the Company earns a 60% interest and a 3% NSR if the Company earns a 100% interest in the property. The Company has the option to purchase one-half of the royalty for \$1,000,000 per 1% at any time prior to the commencement of commercial production.

Beginning December 31, 2010 and annually thereafter the Optionee will make an annual advance minimum royalty payment of \$35,000, increasing to \$50,000 annually on December 2012 and thereafter. These payments will be adjusted annually according to the CPI base of December 31, 2006. Annual advance minimum royalty payments are deductible from future NSR royalty payments.

On August 21, 2009 the Company entered into an option agreement with JRTL Capital Corp. ("JRTL") in respect to Swift Katie mineral property. On December 3, 2009, JRTL changed its name to Tosca Mining Corp. ("Tosca").

Pursuant to the agreement, the Company granted Tosca a working option to acquire 60% interest in Swift Katie property subject to the reservation of a 3% net smelter return royalty ("NSR") over the property in favour of the original property vendors. Details of the agreement are disclosed in Note 8 (b) to the Company's audited financial statements for the year ended December 31, 2009.

Currently, the Swift Katie property is comprised of 13 contiguous mineral claims covering an area of approximately 7,064 hectares. The property is located seven kilometres southwest of Salmo and is near a developed transportation and communication network, a developed power and gas grid and a professional population base on which to draw.

A National Instrument 43-101 ("NI 43-101") compliant Technical Report entitled "Swift Katie Copper-Gold Property" was prepared in 2007 (available on www.sedar.com). The report documents the exploration history and results of several geological, geochemical and geophysical surveys, including the drilling of 65 core holes for a total of 14,866 metres, which resulted in the identification of several exploration targets, with the most significant being the Katie, the 17 and the Swift zones. A success contingent phased exploration program was recommended to verify earlier work and focus on expanding and further delineating the known zones of mineralization.

Valterra commenced an inaugural exploration evaluation on the property beginning in October 2007. A four-month long program was implemented and included a 1:5,000 scale reconnaissance mapping and sampling program; a three hole diamond drilling campaign that totalled 1,126 metres; and an approximately 505 line-kilometre Airborne DIGHEM geophysical survey was completed over an estimated 95% of the property attempting to define major lithological variations and structural breaks associated with the mineralization.

Valterra Resource Corporation (An Exploration Stage Company)

Management's Discussion and Analysis

In respect of the six months ended June 30, 2010

E. Description of Mineral Properties, continued

ii) Swift Katie Mineral Property, continued

From June to September 2008, the company conducted a second diamond drill program on the project. This drill program focused primarily on the Katie Main zone and included 10 holes that totalled 2,954 metres and resulted in the collection of over 1,500 core samples for analyses. Assay results from this work were disclosed publicly on January 26, 2009 (see NR-02-09). The results of the program were very encouraging with all holes intersecting anomalous Cu and Au mineralization.

Drilling highlights include: hole VKT08-068 returned 0.21% Cu and 1.25 g/t Au over 7.90 metres; and drill hole VKT08-071 that graded 0.25% Cu and 0.47 g/t Au over 33.07 metres and included a higher grade gold zone of 0.05% Cu and 1.73 g/t Au over 7.07 metres.

During the first-half of 2010, several Swift Katie planning and budgeting sessions were conducted between the Company and Tosca Mining Corp., and the permit documents were tabled with the government agencies (see NR-04-10). Field crews are preparing to mobilize to the Salmo area where the drill program is anticipated to start in early August once permits are approved. Several Cu-Au target anomalies have been prioritized from recent studies on the existing airborne and ground geophysics data, coupled with the 3D computer modeling of the Main zone drilling.

iii) Toughnut Mineral Property

The 2010 drilling program on the Au-Ag-Cu-Pb-Zn Toughnut property will be run concurrently with the Star program outlined above. The Company anticipates a start up for early July and a total of approximately 1,000m is planned for the primary Toughnut mineral zone.

Prior to the drilling, the Company retained Aeroquest Limited in May 2010 to conduct a helicopter-borne AeroTEM III EM-MAG geophysical survey. An area of approximately 30 square kilometres was flown covering the entire Toughnut property region (see NR-03-10). The preliminary data from the survey was very encouraging with several anomalies identified and worthy of follow up in future exploration phases. The final data and reporting from the contractor is expected in July.

On March 10, 2009, the Company entered into an option agreement to acquire a 100% undivided interest in the 1,009 hectare Toughnut property, comprising nine mineral claims and one Crown-grant claim located in the Nelson Mining Division of British Columbia (the "Toughnut Property").

To acquire a 100% interest in the Toughnut Property, the Company is required to make staged payments totalling \$200,000, incur total and aggregate \$1,250,000 of exploration expenditures, and issue 400,000 of its common shares to the Optionors over the next five years (to March 10, 2014).

The Optionors of the Toughnut Property retain a net smelter return ("NSR") royalty of 1% on three mineral claims and 2% on the remainder of the property. The Company has the option to purchase one-half of the Optionors' NSR royalty by payment of the sum of \$1,000,000.

Valterra Resource Corporation (An Exploration Stage Company)

Management's Discussion and Analysis

In respect of the six months ended June 30, 2010

E. Description of Mineral Properties, continued

iii) Toughnut Mineral Property, continued

In addition to the Optionors' NSR royalty of 1% on the three mineral claims, there is an underlying royalty, pursuant to which third parties are entitled to a 1% NSR royalty on these three mineral claims, up to a maximum aggregate amount of \$1,000,000.

As at June 30, 2010, the Company paid \$5,000, issued 200,000 shares to the Optionors at a fair value of \$10,000, and incurred \$84,979 of exploration expenditures.

On March 4, 2010 the parties to the agreement amended the option payment and exploration commitment due on March 10, 2010 as follows:

- Issue 100,000 common share on or before March 10, 2010 (Issued)
- Incur \$300,000 in exploration expenditures on or before September 30, 2010 and
- Pay \$30,000 on or before August 1, 2010 (\$6,000 paid, negotiations are underway to modify the option agreement)

iv) Rozan Mineral Property

On January 13, 2010, the Company entered into an option agreement to acquire a 100% undivided interest in the 1,950 hectare Rozan Property.

To acquire a 100% interest in the Rozan Property, the Company is required to make staged payments totaling \$200,000, incur total exploration expenditures of \$1,000,000, and issue 350,000 of its common shares with 350,000 5-year warrants to the optionors over five years.

The optionor of the Rozan Property retains a 2% NSR on the property. The Company has the option to purchase one-half of the optionor's NSR royalty by payment of the sum of \$500,000.

In addition to the optionor's NSR royalty of 2% on the property, there is an underlying royalty, pursuant to which a third party is entitled to a 1% NSR royalty on the property. The additional 1% NSR is subject to a right of first purchase by the optionor. Should the optionor acquire the additional 1% NSR on the property, the Company will have first right of purchase to acquire this royalty should the optionor elect in the future to sell it to a third party.

Valterra Resource Corporation (An Exploration Stage Company)

Management's Discussion and Analysis

In respect of the six months ended June 30, 2010

F. Mineral Properties Expenditures

Information on all mineral property expenses by property can be found in Note 8 to the interim financial statements dated June 30, 2010. The deferred mineral property expenditures as at June 30, 2010 were as follows:

	Balance	Additions			Balance
	December 31, 2009	Q1	Q2	YTD	June 30, 2010
	\$	\$	\$	\$	\$
Toughnut	42,806	6,145	58,560	64,705	107,511
Star	660,817	29,474	133,949	163,423	824,240
Swift Katie	1,640,692	-	-	-	1,640,692
Rozan	-	13,625	2,593	16,218	16,218
Total	2,344,315	49,244	195,102	244,346	2,588,661

During the six months ended June 30, 2010, the Company incurred \$37,246 in acquisition and property maintenance costs on its properties as follows: \$26,322 on the Star mineral property, \$3,079 on the Toughnut mineral property, and \$7,845 on the Rozan mineral property.

During the six months ended June 30, 2010, the Company incurred \$207,100 of exploration costs on its properties as follows: \$137,101 on the Star mineral property, \$61,626 on the Toughnut property, and \$8,373 on the Rozan mineral property.

	Toughnut	Star	Swift Katie	Rozan	Total
	\$	\$	\$	\$	\$
Acquisitions	22,532	59,806	133,889	7,845	224,072

Travel and promotion	805	567	238	41.98
Future Income Tax Recovery	1,563	-	1,563	-
Tax benefits renounced to flow-through shares	190,239	300,000	(109,761)	(36.59)

During the six months ended June 30, 2010, the Company incurred a net loss of \$59,939 compared to a net profit from the six months ended June 30, 2009 of \$32,302.

The change was primarily due to the decrease of the future income tax recovery from the flow-through shares. Future income tax recovery is a non-cash item, related to the tax benefits of eligible Canadian exploration expenditures renounced to flow-through share subscribers in February 2010 and 2009.

The loss for the six months ended June 30, 2010 before the future income tax recovery due to renunciation was \$250,178 compared to a net loss of \$267,698 for the previous period. The decrease of \$17,250 in the net loss before future income tax recovery due to renunciation was mainly due to the change in the following expenses:

Valterra Resource Corporation (An Exploration Stage Company)

Management's Discussion and Analysis

In respect of the six months ended June 30, 2010

G. Results of Operations, continued

- (i) Consulting fees decreased by \$17,764 due to decrease in investor relation activities as the Company did not announce or participate in any equity financings or private placements.
- (ii) Professional fees decreased by \$11,955 due to decrease in requirement for these services.
- (iii) General exploration expenses increased by \$7,533 due to the increase in new property research for exploration purposes
- (iv) Regulatory fees and taxes increased by \$10,623 due to the penalties payable the unspent balance of funds raised through flow-through private placements.

H. Quarterly Results

Operating expenses during the three months ended June 30, 2010 increased marginally compared to the previous quarter ended March 31, 2010.

The following financial data was derived from the Company's financial statements for the current and eight previous quarters:

	Jun 30 2010 \$	Mar 31 2010 \$	Dec 31 2009 \$	Sep 30 2009 \$	Jun 30 2009 \$	Mar 31 2009 \$	Dec 31 2008 \$	Sep 30 2008 \$	Jun 30 2008 \$

Valterra Resource Corporation (An Exploration Stage Company)

Management's Discussion and Analysis

In respect of the six months ended June 30, 2010

I. Financial Conditions, Liquidity and Capital Resources

The Company does not generate any revenue from operations and has limited financial resources. The Company finances its operations by raising capital in the equity markets. For the foreseeable future, the Company will need to rely on the sale of such securities to provide working capital and to finance its mineral property acquisition and exploration activities.

Although the Company has been successful in the past in obtaining financing through the sale of its securities, there can be no assurance that the Company will be able to obtain adequate financing in the future in light of factors such as the market demand for its securities, the general state of financial markets and other relevant factors. Failure to obtain such additional financing could result in delay or indefinite postponement of further exploration and development of its projects with a possible loss of some properties and reduction or termination of operations.

The Company had a net working capital deficiency of \$692,056 (current assets of \$415,157 minus current liabilities of \$1,107,213) as at June 30, 2010 compared to a net working capital deficiency of \$207,935 as at December 31, 2009 (current assets of \$601,108 minus current liabilities of \$809,043). Excluding cash reserved for Canadian exploration expenditures of \$390,522, net working capital deficiency as at June 30, 2010 was \$1,082,578 (December 31, 2009: \$708,763).

To address the working capital deficiency, the Company has been reducing general and administration costs, where possible, negotiating extended payment terms of its trade payables, and reviewing its capital expenditure plan and future commitments to identify opportunities to reduce or delay spending and payments.

However, at June 30, 2010 the unrestricted cash balance of \$4,423 would be insufficient to meet the cash requirements for the Company's administrative overhead and maintaining its mineral interests in the coming year. Therefore, the Company will be required to raise additional capital in order to fund its operations in 2010. There is no assurance that such financing will be available to the Company.

i) Equity financings

The Company did not announce or participate in any equity financings or private placements during the six months ended June 30, 2010 and as at August 18, 2010.

ii) Funds raised by stock options and share purchase warrants exercise

There were no stock options and share purchase warrants exercised during the six months ended June 30, 2010 and as at August 18, 2010.

iii) Mineral properties expenditures

During the six months ended June 30, 2010, the Company spent \$164,642 in cash on mineral properties (net of shares issued for acquisition costs, ending balances of accounts payable for mineral properties and earn-in).

Valterra Resource Corporation (An Exploration Stage Company)

Management's Discussion and Analysis

In respect of the six months ended June 30, 2010

I. Financial Conditions, Liquidity and Capital Resources, continued

iv) Amount receivable

As at June 30, 2010, the Company had \$13,296 GST receivable (December 31, 2009: \$10,564) Accrued interest on the reclamation bond for Swift Katie was \$402 (December 31, 2009: \$402).

v) Commitments

(a) As of the date of this MD&A, the Company has contractual obligations and mineral property option agreement commitments as set out below:

	Total	Less than 1 year	1-3 years	4-5 years
Star Option Expenditures (US Dollars)	\$ 175,000	25,000	110,000	40,000
Swift Katie Option Expenditures*	340,000	95,000	195,000	50,000
Toughnut Option Expenditures	189,000	59,000	130,000	-
Toughnut Exploration Expenditures	950,000	200,000	750,000	-
Rozan Option Expenditures	200,000	30,000	110,000	60,000
Rozan Exploration Expenditures	1,000,000	50,000	700,000	250,000
Total Mineral Property Obligations	\$ 2,854,000	459,000	1,995,000	400,000
Manex service agreement**	176,000	96,000	80,000	-
Total Service Agreement Commitments	\$ 176,000	96,000	80,000	-

*The option agreement with Tosca will facilitate the commitments necessary for the Swift Kate mineral property.

**Pursuant to a service agreement, as amended, between the Company and a company privately held by the President of the Company, the Company may terminate the service contract agreement related to office and administration services at any time by paying the remaining monthly fees for a year from the date of the written notice of the termination. The agreement expires on June 30, 2012.

	Total	Less than 1 year	1-3 years	4-5 years
Toughnut Shares To Be Issued	250,000	50,000	200,000	-
Rozan Warrants To Be Issued	300,000	50,000	150,000	100,000
Total Equity Commitments	300,000	50,000	150,000	-

I. Financial Conditions, Liquidity and Capital Resources, continued

v) Commitments, continued

(b) Flow-through expenditures

Funds raised through the issuance of flow-through shares are required to be expended on qualifying Canadian mineral exploration expenditures, as defined pursuant to Canadian income tax legislation. The flow-through gross proceeds less the qualified expenditures made to date represent the funds received from flow-through share issuances that have not been spent and are held by the Company for such expenditures.

The Company is committed to incur qualifying Canadian exploration expenditures of \$551,025 by December 31, 2010 relating to the private placements of flow-through shares completed in December 2009.

As at August 18, 2010, the Company had incurred qualifying expenditures of approximately \$376,457 with respect to exploration activities at its mineral properties, with a remaining commitment of \$174,568 to be incurred by December 31, 2010.

J. Outstanding Equity and Convertible Securities

The Company has unlimited authorized number of voting common shares without par value.

i) Issued and outstanding shares and contributed surplus

As at June 30, 2010 and August 18, 2010 the Company had 37,832,543 common shares issued and outstanding.

		10,252,388	500,000	9,752,388
Weighted average exercise price		\$0.16	\$0.30	\$0.15
Weighted average contractual life in years		1.15		1.08

vi) Fair Value Determination

The Company applies the fair value method of accounting for stock-based awards and, accordingly, the fair value of stock-based awards is expensed in the statements of operations, comprehensive loss, and deficit or capitalized to mineral properties as appropriate.

The fair value of share purchase warrants issued to pursuant to the Rozan option agreement was estimated at the date of grant based on the Black-Scholes option pricing model using the following weighted average assumptions:

Valterra Resource Corporation (An Exploration Stage Company)

Management's Discussion and Analysis

In respect of the six months ended June 30, 2010

J. Outstanding Equity and Convertible Securities, continued

vi) Fair Value Determination, continued

	June 30, 2010		June 30, 2009	
	Options	Warrants	Options	Warrants
Risk-free interest rate	n/a	2.56%	2.11%	1.41%
Expected share price volatility	n/a	170.60%	117.44%	131.33%
Expected option/warrant life in years	n/a	5.0	5.0	2.0
Expected dividend yield	n/a	0%	0%	0%

Option pricing models require the input of highly subjective assumptions. Changes in the subjective input assumptions can materially affect the fair value estimate, and therefore the existing models may not necessarily provide a single reliable measure of the fair value of the Company's stock options and agents warrants.

K. Related Parties Information

Following are the related party transactions that the Company entered into during the six months ended June 30, 2010 and the outstanding balances as at June 30, 2010:

- (a) Under the service agreement, as amended, between the Company and a company privately held by a director and officer of the Company, the Company was charged as follows:
- \$51,504 (June 30, 2009: \$53,700) for office space and general administration services;
 - \$26,764 (June 30, 2009: \$35,075) for professional services;
 - \$18,495 (June 30, 2009: \$22,845) for consulting services;
 - \$14,801 (June 30, 2009: \$19,344) for investor relations services;
 - \$85,098 (June 30, 2009: \$111,210) for geological consulting services in relation to mineral properties
 - \$1,988 (June 30, 2009: \$2,172) in respect of the mark-up on out-of-pocket expenses, which were included in office and general expenses.

Amounts payable under the agreement at June 30, 2010 were \$512,728 (December 31, 2009: \$369,887).

- (b) Fees in the amount of \$13,035 (June 30, 2009: \$39,183) were charged by a law firm controlled by a company privately held by a director and officer of the Company and included in investor relations, professional fees, share issue costs and mineral property expenditures. Amounts payable as at June 30, 2010 were \$72,319 (December 31, 2009: \$58,675).

Valterra Resource Corporation (An Exploration Stage Company)

Management's Discussion and Analysis

In respect of the six months ended June 30, 2010

K. Related Parties Information, continued

- (c) Consulting fees relating to office administration of \$12,000 (June 30, 2009: \$12,000) were charged by a private company controlled by an officer (resigned as an officer effective July 2010) of the Company. Amounts payable as at June 30 2010 were \$23,100 (December 31, 2009: \$10,500).
- (d) Independent director's fees of \$23,250 (June 30, 2009: \$22,125) were charged. Amounts payable as at June 30, 2010 were \$50,378 (December 31, 2009: \$27,493)
- (e) In order to facilitate the Star option payment on May 13, 2010 as per the option agreement, the Company received advances from two directors and officers and two employees of the Company for \$25,494.
- (f) Consulting fees relating to corporate development and financing activities was charged by a private company controlled by a former director of the Company in the previous fiscal year and were included in consulting fees and share issue costs in 2009. Amounts payable as at June 30, 2010 were \$24,675 (December 31, 2009: \$24,675).

The total amount due to related parties as at June 30, 2010 was \$708,694 (December 31, 2009: \$463,737). Amounts due to related parties are unsecured, non-interest bearing, and have no formal terms of repayment.

These transactions are in the normal course of operations and are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

L. Financial Instruments

The Company's financial instruments include cash, investment, reclamation bonds, bank indebtedness, accounts payable and accrued liabilities, and amounts due to related parties which are classified into the following categories:

Financial Instrument	Category	Carrying value
Cash	Held-for-trading	Fair value
Investment	Available-for-sale	Fair value
Reclamation Bonds	Loans and Receivables	Fair value
Bank Indebtedness	Other financial liabilities	Amortized cost
Accounts payable and accrued liabilities	Other financial liabilities	Amortized cost
Due to related parties	Other financial liabilities	Amortized cost

The carrying values of the financial instruments held by the Company are a reasonable estimate of the fair values due to the relatively short time period to maturity.

The fair value of investment during the six months ended June 30, 2010 was based on its quoted market value as at the period end (Level 1). The Company has no exposure to Asset Backed Commercial Paper.

Valterra Resource Corporation (An Exploration Stage Company)

Management's Discussion and Analysis

In respect of the six months ended June 30, 2010

M. Subsequent Events and Outlook

There are no events subsequent to the date of this document that have not yet been disclosed.

The Company is confident that its existing group of properties has potential warranting continued exploration. Activities over the ensuing year will focus on these assets. The Company expects to continue its strategy of collaborating with experienced mining companies to develop its properties and to advance them to production.

N. Off-Balance Sheet Arrangements

The Company does not have any off-balance sheet arrangements and does not contemplate having them in the foreseeable future.

O. Use of Estimates

Preparing financial statements requires management to make estimates and assumptions that affect the reported results. The estimates are based on historical experience and other assumptions believed to be reasonable under the circumstances. Critical accounting policies are disclosed in the annual audited financial statements.

P. Disclosure Controls and Procedures

The Board of Directors, through its Audit Committee, is responsible for ensuring that management fulfils its responsibilities for financial reporting and internal control. The Audit Committee is composed of three independent directors, who meet at least quarterly with management and, at least annually with the external auditors to review accounting, internal control, financial reporting, and audit matters.

Effective November 16, 2006, the audit committee adopted resolutions that authorized the establishment of procedures for complaints received regarding accounting, internal controls or auditing matters, and for a confidential, anonymous submission procedure for employees who have concerns regarding questionable accounting or auditing matters. The implementation of the Whistleblower policy is in accordance with Multilateral Instrument 52-110 Audit Committees, national Policy 58-201 Corporate Governance Guidelines and National Instrument 58-101 Disclosure of Corporate Governance Practices.

The Canadian Securities Administrators ("CSA") have published National Instrument 52-109 Certification of Disclosure in Issuers' Annual and Interim Filings ("NI 52-109") which applies to interim and annual financial periods ending on or after December 15, 2008. Being a venture issuer, the Company is exempted from the certification on Disclosure Controls and Procedures ("DC&P") and Internal Control Over Financial Reporting ("ICFR"). The Company is required to file Form 52-109FV1 for the annual reporting.

Valterra Resource Corporation (An Exploration Stage Company)

Management's Discussion and Analysis

In respect of the six months ended June 30, 2010

Q. Risks and Uncertainties

The principal business of the Company is the acquisition, exploration and development of mineral properties. Given the nature of the mining business, the limited extent of the Company's assets and the present stage of development, the following risk factors, among others, should be considered.

Exploration Stage Company

The Company does not hold any known mineral reserves of any kind and does not generate any revenues from production. The Company's success will depend largely upon its ability to locate commercially productive mineral reserves. Mineral exploration is highly speculative in nature, involves many risks and frequently is non productive. There is no assurance that exploration efforts will be successful. Success in establishing reserves is a result of a number of factors, including the quality of management, the level of geological and technical expertise, and the quality of property available for exploration.

Once mineralization is discovered, it may take several years in the initial phases of drilling until production is possible, during which time the economic feasibility of production may change. Substantial expenditures are required to establish proven and probable reserves through drilling and bulk sampling, to determine the optimal metallurgical process to extract the metals from the ore and, in the case of new properties, to construct mining and processing facilities. Because of these uncertainties, no assurance can be given that our exploration programs will result in the establishment or expansion of resources or reserves.

No Operating History and Availability of Financial Resources

The Company does not have an operating history and has no operating revenues and is unlikely to generate any in the foreseeable future. Hence, it may not have sufficient financial resources to undertake by itself all of its planned mineral property acquisition and exploration activities. Operations will continue to be financed primarily through the sale of securities.

The Company will need to continue its reliance on the sale of such securities for future financing, which may result in dilution to existing shareholders. Furthermore, the amount of additional funds required may not be available under favourable terms, if at all. Failure to obtain additional funding on a timely basis could result in delay or indefinite postponement of further exploration and development and could cause the Company to forfeit its interests in some or all of its properties or to reduce or discontinue its operations.

Price Volatility and Lack of Active Market

In recent months, the securities markets in Canada and elsewhere have experienced a high level of price and volume volatility, and the market prices of securities of many public companies have experienced significant fluctuations in price which have not necessarily been related to the operating performance, underlying asset values or prospects of such companies. It may be anticipated that any quoted market for the Company's securities will be subject to such market trends and that the value of such securities may be affected accordingly. If an active market does not develop, the liquidity of the investment may be limited and the market price of such securities may decline below the subscription price.

Valterra Resource Corporation (An Exploration Stage Company)

Management's Discussion and Analysis

In respect of the six months ended June 30, 2010

Q. Risks and Uncertainties, continued

Competition

The resource industry is intensively competitive in all of its phases, and the Company competes with many other companies possessing much greater financial and technical resources. Competition is particularly intense with respect to the acquisition of desirable undeveloped properties. The principal competitive factors in the acquisition of prospective properties include the staff and data necessary to identify and investigate such properties, and the financial resources necessary to acquire and develop the projects. Competition could adversely affect the Company's ability to acquire suitable prospects for exploration.

Government Regulations and Environmental Risks and Hazards

The Company's operations are subject to various federal, provincial, state laws, rules and regulations, including environmental legislation.

Environmental legislation is becoming increasingly stringent and costs and expenses of regulatory compliance are increasing. The impact of new and future environmental legislation on the Company's operations may cause additional expenses and restrictions. If the restrictions adversely affect the scope of exploration and development on the resource property interests, the potential for production on the property may be diminished or negated. The Company has adopted environmental practices designed to ensure that it continues to comply with environmental regulations currently applicable to it. All of the Company's activities are in compliance in all material respects with applicable environmental legislation.

Environmental hazards may exist on the Company's properties, which may have been caused by previous or existing owners or operators of the properties. The Company is not aware of any existing environmental hazards related to any of its current or former property interests that may result in material liability to the Company.

Title to Property

Although the Company has exercised the usual due diligence with respect to title to properties in which it has a material interest, there is no guarantee that title to the properties will not be challenged or impugned. The Company's mineral property interest may be subject to prior unregistered agreements or transfers, aboriginal land claims, government expropriation and title may be affected by undetected defects. In addition, certain of the mining claims in which the Company has an interest are not recorded in the name of the Company and cannot be recorded until certain steps are taken by other parties.

Dependence on Key Personnel

The Company is dependent on a relatively small number of key directors, officers and senior personnel. Loss of any one of those persons could have an adverse effect on the Company. The Company does not currently maintain "key-man" insurance in respect of any of its management.

Valterra Resource Corporation (An Exploration Stage Company)

Management's Discussion and Analysis

In respect of the six months ended June 30, 2010

R. Changes in Accounting Policies, Including Initial Adoptions and Future Accounting Changes

i) Business Combinations

In January 2009, the CICA issued CICA Handbook Section 1582, Business Combinations, Section 1601, Consolidations, and Section 1602, Non-controlling Interests. These sections replace the former CICA Handbook Section 1581, Business Combinations and Section 1600, Consolidated Financial Statements and establish a new section for accounting for a non-controlling interest in a subsidiary.

Section 1582 and 1602 will require net assets, non-controlling interests and goodwill acquired in a business combination to be recorded at fair value and non-controlling interests will be reported as a component of equity. In addition, the definition of a business is expanded and is described as an integrated set of activities and assets that are capable of being managed to provide a return to investors or economic benefits to owners. Acquisition costs are not part of the consideration and are to be expensed when incurred. Section 1601 establishes standards for the preparation of consolidated financial statements.

These new sections apply to interim and annual financial statements relating to fiscal years beginning on or after January 1, 2011. Earlier adoption of these sections is permitted as of the beginning of a fiscal year. All three sections must be adopted concurrently. The company will evaluate the impact on these new sections on its financial statements when applicable.

ii) International Financial Reporting Standards ("IFRS")

In February 2008, the Canadian Accounting Standards Board confirmed that publicly accountable enterprises will be required to adopt IFRS for fiscal years beginning on or after January 1, 2011, with early adoption permitted. Accordingly, the conversion to IFRS will be applicable to the Company's interim and annual financial statements relating to reporting periods beginning on or after January 1, 2011 with restatement of comparative information presented.

The conversion to IFRS will impact the Company's accounting policies, information technology and data system, internal control over financial reporting, and disclosure controls and procedures. The Company has established an implementation team to develop and implement the changeover plan to IFRS on a timely basis.

As at June 30, 2010 the Company has identified current GAAP applicable to the Company that will be affected by the changeover and differences with the corresponding IFRSs and has outlined appropriate policy choices allowed under IFRS.

The management submitted a document outlining the differences between and current GAAP and IFRS, appropriate policy choices and their impact on the Company's financial statements and business processes to the Audit Committee for discussion. Possible major impact that management expects IFRS will have on the Company's financial position are summarized in the following table. IFRS will also have more extensive disclosure and analysis of balances and transactions in the notes to the financial statements.

Valterra Resource Corporation (An Exploration Stage Company)

Management's Discussion and Analysis

In respect of the six months ended June 30, 2010

R. Changes in Accounting Policies, Including Initial Adoptions and Future Accounting Changes, continued

Key areas	Canadian GAAP	IFRS	Preliminary analysis
Mineral properties and deferred exploration costs	Exploration, evaluation and development costs can be either capitalized or expensed when incurred.	IFRS has only limited guidance on this topic and currently allows the Company to carry its current treatment.	Recommend to expense the exploration evaluation and development cost.
Stock-based compensation	Stock-based compensation is determined using the Black Scholes option pricing model. Allows the option to use straight-line method or accelerated method to account for graded vesting features.	Stock-based compensation is determined using the Black Scholes option pricing model. For graded-vesting features, each installment is to be treated as a separate share option grant because each installment has a different vesting period, and hence the fair value of each installment will differ.	The recognition of the value of stock-based compensation will be higher at the early vesting stage and will decrease as options are near the final vesting stage.

S. Licenses and Permits

The operations of the Company require licenses and permits from various government authorities. The Company believes that it holds all necessary licenses and permits under applicable laws and regulations for work in progress and believes it is presently complying in all material respects with the terms of such licenses and permits. However, such licenses and permits are subject to change in various circumstances. There can be no guarantee that the Company will be able to obtain or maintain all necessary licenses and permits that may be required to explore and develop its properties, commence construction or operation of mining facilities or to maintain continued operations that economically justify the cost.

T. Proposed Transactions

Previously the Company reported that it was contemplating a business arrangement with another junior exploration company, which would result in an amalgamation of the two companies into one entity.

However, discussions about this amalgamation have been put on hold for an indefinite period since the management believes that the current market conditions would enable the Company to finance its projects independently.

Valterra Resource Corporation (An Exploration Stage Company)

Management's Discussion and Analysis

In respect of the six months ended June 30, 2010

U. Forward-Looking Statements

Some of the statements contained in this MD&A may be deemed "forward-looking statements." These include estimates and statements that describe the Company's future plans, objectives or goals, and expectations of a stated condition or occurrence.

Forward-looking statements may be identified by the use of words such as "believes", "anticipates", "expects", "estimates", "may", "could", "would", "will", or "plan". Since forward-looking statements are based on assumptions and address future events and conditions, by their very nature they involve inherent risks and uncertainties.

Actual results relating to, among other things, results of exploration, reclamation, capital costs, and the Company's financial condition and prospects, could differ materially from those currently anticipated in such statements for many reasons such as but not limited to; changes in general economic conditions and conditions in the financial markets; changes in demand and prices for the minerals the Company expects to produce; litigation, legislative, environmental and other judicial, regulatory, political and competitive developments; technological and operational difficulties encountered in connection with the Company's activities; and changing foreign exchange rates and other matters discussed in this MD&A.

Readers should not place undue reliance on the Company's forward-looking statements. Further information regarding these and other factors, which may cause results to differ materially from those projected in forward-looking statements, are included in the filings by the Company with securities regulatory authorities. The Company does not assume any obligation to update or revise any forward-looking statement that may be made from time to time by the Company or on its behalf, except in accordance with applicable securities laws, whether as a result of new information, future events or otherwise.
